

GLENGUIN ESTATE

## 2007 TWO THOUSAND VINES VIOGNIER

**Vineyard ;** We only have 2,000 Viognier vines at Glenguin planted in sandy loam over clay. The clone is "Montpellier" from the Languedoc in southern France and produces very small thick skinned berries. This combines with the low yields (1.5 tonnes per acre) to produce grapes of great concentration.

**Vinification ;** 80% steel tank fermented and 20% in barriques this Viognier has no malo lactic fermentation or extended barrel ageing. After four months on lees the two parcels were combined and bottled to maintain maximum fruit freshness.

**The Wine ;** This classic variety grows exceptionally well on sandy loam over red basalt soils at Glenguin. Distinctive apricot aromas combine with a rich creamy mouthful of stonefruit characters. This mouthwatering spicy white will be at its best over the next few years. 200 cases made.
